SAFETY DATA SHEET

SECTION 1: PRODUCT IDENTIFICATION

PRODUCT NAME
HYDROXYUREA, USP

PRODUCT CODE
1354

SUPPLIER
MEDISCA Inc.
Tel.: 1-800.932.1039 | Fax.: 1-855.850.5855
661 Route 3, Unit C, Plattsburgh, NY, 12901
3955 W. Mesa Vista Ave., Unit A-10, Las Vegas, NV, 89118
6641 N. Belt Line Road, Suite 130, Irving, TX, 75063

MEDISCA Pharmaceutique Inc.
Tel.: 1-800.665.6334 | Fax.: 514.338.1693
4509 Rue Dobrin, St. Laurent, QC, H4R 2L8
21300 Gordon Way, Unit 153/158, Richmond, BC V6W 1M2

MEDISCA Australia PTY LTD
Tel.: 1-300.786.392 | Fax.: 61.2.9700.9047
Unit 7, Heritage Business Park
5-9 Ricketty Street, Mascot, NSW 2020

MEDISCA UK Limited
Tel.: 0800.029.4641
33 St. James’s Square, London, United Kingdom SW1Y 4JS

EMERGENCY PHONE
CHEMTREC Day or Night Within USA and Canada: 1-800-424-9300

NSW Poisons Information Centre: 131 126
National Chemical Emergency Centre 44(0)1235239670

USES
Anti-neoplastic agent

SECTION 2: HAZARDS IDENTIFICATION

GHS CLASSIFICATION
Eye Irritation (Category 2B)
Germ Cell Mutagenicity (Category 2)
Toxic to Reproduction (Category 1B)
Carcinogenicity (Category 2)
Specific Target Organ Toxicity - Repeated Exposure (Category 1) - (Bone Marrow)

PICTOGRAM

SIGNAL WORD
Danger

HAZARD STATEMENT(S)
Cytotoxic! Extremely hazardous to all tissues.
Causes eye irritation.
Suspected of causing genetic defects
May damage fertility or the unborn child.
Suspected of causing cancer.
Causes damage to organs (bone marrow) through prolonged or repeated exposure.

ADVERSE PHYSICOCHEMICAL, HUMAN HEALTH AND ENVIRONMENTAL EFFECTS
Not Applicable
SAFETY DATA SHEET

PRECAUTIONARY STATEMENT(S)

Prevention
Obtain special instructions before use.
Do not handle until all safety precautions have been read and understood.
Do not breathe dust/fume/gas/mist/vapors/spray.
Do not eat, drink or smoke when using this product.
Wear protective gloves, protective clothing, eye protection, face protection.
Wash thoroughly after handling.

Response
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
IF EXPOSED OR CONCERNED: Get medical advice/attention if you feel unwell. Call a poison center.

Storage
Store locked up.

Disposal
Dispose of contents and/or container in accordance with local regulations.

HMIS CLASSIFICATION

Health Hazard 4
Flammability 0
Reactivity 0
Personal Protection K

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

CHEMICAL NAME 1-hydroxyurea
BOTANICAL NAME Not applicable
SYNONYM Hydroxycarbamide; N-Hydroxyurea
CHEMICAL FORMULA CH₄N₂O₂
CAS NUMBER 127-07-1
ALTERNATE CAS NUMBER Not applicable
MOLECULAR WEIGHT 76.05

<table>
<thead>
<tr>
<th>CHEMICAL NAME</th>
<th>CAS NUMBER</th>
<th>EC NUMBER</th>
<th>% BY WEIGHT</th>
</tr>
</thead>
<tbody>
<tr>
<td>HYDROXYUREA</td>
<td>127-07-1</td>
<td>204-821-7</td>
<td>100</td>
</tr>
</tbody>
</table>

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as health hazards and hence require reporting in this section.

NOTES
An antineoplastic agent that may inhibit DNA synthesis through the inhibition of ribonucleotide reductase.

Chemical family: Urea

SECTION 4: FIRST-AID MEASURES

IN CASE OF EYE CONTACT
Flush with copious amounts of water for 15 minutes, separating eyelids with fingers. If irritation persists seek medical aid.

IN CASE OF SKIN CONTACT
If at any time there is skin contact with any cytotoxic drug, thoroughly wash the affected area with soap and water for 15 minutes. The worker should not scrape or abrade the skin by using a scrub brush as this could increase exposure. It is always recommended to seek a medical evaluation by a physician.

IF SWALLOWED
Call a physician. Wash out mouth with water. Do not induce vomiting without medical advice.

IF INHALED
Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician

SYMPTOMS AND EFFECTS
Refer to section 11
SECTION 5: FIREFIGHTING MEASURES

SPECIFIC HAZARDS ARISING FROM THE CHEMICAL
Explosion hazard: Avoid generating dust; fine dust dispersed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard.

FLAMMABLE PROPERTIES
May be combustible at high temperature

HAZARDOUS COMBUSTION PRODUCTS
Under fire conditions, hazardous fumes will be present.

SUITABLE & UNSUITABLE EXTINGUISHING MEDIA
Small fire: dry chemical, CO₂ or water spray. Large fire: dry chemical, CO₂, alcohol resistant foam or water spray. Do not get water inside containers.

PROTECTIVE EQUIPMENT AND PRECAUTIONS FOR FIREFIGHTERS
Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes.

NOTES
Dust explosion properties:
Kst: 78 bar.m/s
St class: 1
Minimum ignition energy (MIE) – dust cloud > 500 mJ

SECTION 6: ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS
Wear respiratory protection. Avoid dust formation. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

METHODS & MATERIAL FOR CONTAINMENT
The use of chemical inactives is not recommended as they may create a hazardous by-product. All contaminated areas should be cleaned a minimum of three times, and all contaminated products and equipment should be disposed of or cleaned in an appropriate manner.

CLEANUP PROCEDURE
A clearly labelled cytotoxic spill kit should be kept wherever cytotoxic medications are being prepared, stored, administered or received (shipping). A spill needs to be cleaned by members of the staff that have received the appropriate training and have the appropriate protective equipment; others should vacate the area as soon as it is safe to do so until the spill is cleaned. All spills should be immediately marked with a warning sign to prevent exposure to others. Glass should never be handled by hand; always use a scoop. The cleanup should be done by as few people as feasible, but there should be at least two people involved.

REFERENCE TO OTHER SECTIONS
See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

SECTION 7: HANDLING AND STORAGE

PRECAUTIONS FOR SAFE HANDLING
Do not inhale. Avoid contact with eyes, skin and clothing. Avoid prolonged or repeated exposure. Wash thoroughly after handling. Store away from incompatible materials, in a well-ventilated area. Eliminate all sources of ignition. Store in accordance with local regulations. Do not store in unlabeled containers. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Use appropriate containment to avoid environmental contamination.

CONDITIONS FOR SAFE STORAGE
Store away from incompatible materials, in a well-ventilated area. Eliminate all sources of ignition. Store in accordance with local regulations. Do not store in unlabeled containers. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Use appropriate containment to avoid environmental contamination.

STORAGE CONDITIONS
Store in original container, tightly sealed, protected from direct sunlight and moisture.

SPECIFIC END USE(S)
Preserve in tight containers, in a dry atmosphere. Protect from light.

See Section 1

EXPOSURE GUIDELINES
Cytotoxic: There are no exposure limits set for cytotoxic drugs. Exposure must be kept to a minimum.

PERSONAL PROTECTIVE EQUIPMENT
Eyes: Wear appropriate protective eyeglasses or chemical safety goggles as described by WHMIS or OSHA’s eye and face protection regulations in 29 CFR 1910.133 or European Standard EN166. Skin: Wear appropriate gloves to prevent skin exposure. Clothing: Wear appropriate protective clothing to minimize contact with skin. Respirators: Follow WHMIS or OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced. Thermal Hazards: For products representing a thermal hazard, appropriate Personal Protective Equipment should be used.

SPECIFIC ENGINEERING CONTROLS
The following engineering controls should be put in place where cytotoxic medications are being used:
A minimum of a Class II biological safety cabinet with HEPA filter exhaust systems that does not allow air to be circulated back into the room should be used while manipulating cytotoxic drugs.
The preparation area within the cabinet should be covered with a plastic backed, absorbent material to reduce dispersion and facilitate the clean-up of any spilled medication.
Medications should be isolated and locked out in such a manner that only those properly trained have access to the storage location.
Puncture proof containers for the disposal of needles, syringes and vials must be provided.
Negative pressure rooms that prevent any spilled medication from leaving the room are also recommended.

NOTES
Additional controls:
Safe work procedures for handling these materials should be developed and taught to all affected staff. Proper signage informing all employees of the presence of cytotoxic drugs and their hazards must be developed and displayed in highly visible locations. Eating, drinking, smoking, applying makeup and the storage of food should be completely prohibited in the preparation area.

USP: ELV: Industrial use: TWA: 0.1 mg/m³

### SECTION 10: STABILITY AND REACTIVITY

**REACTIVITY**
Not established

**CHEMICAL STABILITY**
Stable under recommended storage conditions. The substance becomes unstable if heated to 125°C. At this temperature it develops a strong exothermic reaction.

**INCOMPATIBLE MATERIALS**
Strong oxidants. Strong acids or alkali.

**HAZARDOUS DECOMPOSITION PRODUCTS**
Toxic fumes of carbon monoxide, carbon dioxide, nitrogen oxides, urea, ammonia and other gases may occur.

**HAZARDOUS POLYMERIZATION**
Will not occur

**POSSIBILITY OF HAZARDOUS REACTION**
Not established

**CONDITIONS TO AVOID**
Moisture, sunlight and extreme temperatures

### SECTION 11: TOXICOLOGICAL INFORMATION

**ACUTE TOXICITY**
- Oral: Rat: LD50: (mg/kg): 5760
- Dermal: Rabbit LD50: (mg/kg): Not available
- Inhalation: Rat: LC50: (mg/L/4hr): Not available

**SKIN CORROSION/IRRITATION**
Based on available data, the classification criteria are not met.
Skin irritation; Result: Mild irritation.

**SERIOUS EYE DAMAGE/EYE IRRITATION**
Causes irritation.
Eye irritation; Result: Mild irritation.

**RESPIRATORY SENSITIZATION**
Due to lack of data the classification is not possible.

**SKIN SENSITIZATION**
Based on available data, the classification criteria are not met. Mouse local lymphnode assay: Result: Negative.
**SAFETY DATA SHEET**

### GERM CELL MUTAGENICITY

Suspected of causing genetic defects. Exposure to cytotoxic drugs has been reported to cause increased frequency of chromosome damage in exposed workers.

- DNA repair assay (rat hepatocytes); Result: Positive.
- In vivo micronucleus assay (Mouse); Result: Positive.
- In vivo sister chromatid exchange assay (rodents); Result: Positive.
- Sperm morphology (mouse); Result: Positive.; Yeast reverse mutation assay; Result: Positive.

Suspected mutagen: In vivo micronucleus test outcome positive according to ISSMIC; mutagen according to ISSSTY

### CARCINOGENICITY

<table>
<thead>
<tr>

</tr>
<tr>
<td>California Proposition 65</td>
<td>This product contains the following chemical known to the State of California to cause birth defects or other reproductive harm: HYDROXYUREA.</td>
</tr>
</tbody>
</table>

### ADDITIONAL CARCINOGENICITY INFORMATION

Suspected of causing cancer. Secondary malignancies are potential delayed effects of many antineoplastic agents, although it is not clear whether the effect is related to their mutagenic or immunosuppressive action. The effect of dose and duration of therapy is also unknown, although risk seems to increase with long-term use. Secondary leukaemias have occurred in patients receiving hydroxyurea for myeloproliferative disorders, although the extent to which this is due to the treatment or the underlying disorder is unknown. Skin cancers have also been associated with its use. These are often multiple and include both squamous cell and basal cell carcinomas.

Repeated long-term occupational exposure to small amounts of cytotoxic drugs has not been identified to cause cancer. However, many cytotoxic drugs are known to be: Genotoxic, Carcinogenetic, Mutagenic.

- 125 - 250 mg/kg 6-Month study (intraperitoneal doses 0.6 to 1.2 x maximum human dose)
  - Result: Increased incidence of mammary tumors; Species: Rat

### REPRODUCTIVE TOXICITY

May damage fertility or the unborn child.

- 100 - 200 mg/kg/day Gestational study
  - Result: Birth defects included abnormal development of the eye and brain and heart defects.; Species: Rat
- 30 mg/kg/day Reproductive study; Result: Fetotoxic and teratogenic.; Species: Rabbit
- 400 - 800 mg/kg/day Gestational study
  - Result: Increased resorption, decreased fetal body weight, and skeletal malformations.; Species: Mouse

Breast feeding: In breast-milk samples from a woman given hydroxyurea 500 mg three times daily, the mean concentration of the drug was found to be about 6 mg/litre. It was estimated that, had the infant been breast-fed, it would have received about 3 to 4 mg daily. Although this amount appears to be low, women are advised not to breast feed while taking hydroxyurea.

Cytotoxic drugs have also been associated with negative health effects for developing fetuses, including higher incidences of spontaneous abortions, congenital malformations, low birth weight, and infertility.

Suspected toxic for reproduction: DART database in the Toolbox reports that this substance as Known developmental potential.

### SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE

Due to lack of data the classification is not possible.

### SPECIFIC TARGET ORGAN TOXICITY - REPEATED EXPOSURE

Causes damage to organs (bone marrow) through prolonged or repeated exposure.

Based on available data, the classification criteria are not met.
**SAFETY DATA SHEET**

**Pharmacologically active material. Occupational exposure may cause physiological effects.**

Hydroxyurea is readily absorbed from the gastrointestinal tract and distributed throughout the body.

Symptoms related to the physical, chemical, and toxicological characteristics:
- Fever.
- Chills.
- Cough.
- Hoarseness.
- Lower back or side pain.
- Painful or difficult urination.
- Bleeding or bruising.
- Black or bloody stools.
- Pinpoint red spots on skin.
- Loss of appetite.
- Mouth sores.
- Diarrhea.
- Nausea.
- Vomiting.
- Constipation.
- Drowsiness.
- Skin rash.
- Itching.

Delayed and immediate effects of exposure:
- Bone marrow depression.
- Cancer.

Medical conditions aggravated by exposure:
- Anemia.
- Leukopenia.
- Neutropenia.
- Bone marrow depression.
- Chickenpox, existing or recent.
- Herpes zoster.
- Infection.
- HIV or AIDS.
- Impaired kidney function.
- Recent cytotoxic drug or radiation therapy.

**SIGNS AND SYMPTOMS OF EXPOSURE**

**SECTION 12: ECOLOGICAL INFORMATION**

**TOXICITY**

EC50: 48 Hr: Crustacea: (mg/L): Not available
LC50: 96 Hr: Fish: (mg/L): Not available
EC50: 72 or 96 Hr: Algae (or other aqua plants): (mg/L): Not available

**PERSISTENCE AND DEGRADABILITY**

Not available

**BIOACCUMULATIVE POTENTIAL**

Log Pow: -1.8 (20°C)

**MOBILITY IN SOIL**

Freely soluble in water
Water solubility: 1.00E+06 mg/L (25°C)
Henry's Law Constant: 5.42E-11 atm-m³/mole (25°C)

**OTHER ADVERSE EFFECTS**

This product is not intended to be released into the environment

**SECTION 13: DISPOSAL CONSIDERATIONS**

**WASTE DISPOSAL**

Plastic bags that are at least 2mm thick (if polypropylene) or 4mm thick (if polyethylene) should be used to collect potentially contaminated materials. Bags should be color-coded and labelled with a cytotoxic warning label. All sharps should be placed in puncture proof containers before bagging. All workplaces should have a policy for segregating waste materials resulting from cytotoxic drug preparation and administration. These plans must meet or exceed the government regulations for hazardous waste disposal.

Housekeeping staff should wear protective gloves while handling waste containers. Cytotoxic waste must be handled differently than regular garbage and must be disposed according to government regulations. In cases where the waste is to be incinerated, it should be noted that completely sealed (airtight) containers that could build pressure and explode must be avoided. Temperatures of 1,000°C to 1,600°C should be used to render the cytotoxic drugs harmless.
