PRODUCT NO.: 8456

Suppository Shell (2.0mL)

Oval, Disposable, White/Opaque Shell, Latex Free

DESCRIPTION: These perforated suppository shells come packed in long strips or rolls that can be torn into the desired quantity of cavities required. A designated fill-line allows enough space for sufficient heat sealing once the mixture has hardened. Upon administration, the suppository shells offer a convenient peel-back feature for easy access to the suppository.

FEATURES:

-  No lubrication required
-  Perforated cavities allow for easy tearing of desired amount of suppositories
-  Heat Sealing provides strong seal to fully enclose the dosage form and allows it to maintain it's shape if suppository mixture happens to melt
-  Made of Polyvinylchloride (PVC), Adhesive Polyurethane, Low Density Polyethylene Lamina

RELATED PRODUCTS:

-  8273: Heat Gun
-  7404: Heat Gun Attachment
-  7057, 9813, 9814: Bag Sealers
