PRODUCT NO.: 9318

Script Assist 1.5

RS Software

DESCRIPTION: Script Assist is the perfect pharmacy management system for today's independent pharmacy. It takes care of business from prescription entry and refill through reimbursement in an easy to use Windows based platform. Written and developed by pharmacists, screens and procedures are tailored to fit the way a pharmacy practice functions. The software integrates seamlessly with many wholesaler's POS modules to manage inventory and track profits. Plus, it works hand in hand with Compound Assist to integrate both types of service.

FEATURES:

-  Multitasking environment with familiar Windows format
-  Customizable toolbars to allow user friendly operation
-  Quick and easy entry of new prescriptions
-  Automatic tracking and scheduling of refills or faxing of refill requests
-  Batch processing to simultaneously accommodate multiple prescriptions
-  DUR data for instantaneous information on drug, drug allergies and interactions
-  Graphic label designer to develop multiple label templates
-  Patient, physician and drug information collected in the format requested by third-party payers
-  Fast claims adjudication without the need for a dedicated phone line
-  Online transmission of Medicare claims including compounds
-  Insurance analysis reports for speedier reconciliation
-  Automatic software and DUR updates without opening web browser
-  Optimized for Windows Vista or newer, business class or better to maintain HIPPA compliance
